

Kraft Paper

Wet Strength

TYPICAL USES

Packaging
3-ply Shipping Sacks
Industrial Sheeting
Agricultural Sheeting
Raisin Tray

End Use Applications
Shingle Wrap
Lawn & Leaf Bags
Yard Waste Bags
Plant Sleeves

Food Waste & Compost Bags
Trash Compactor Bags
Potato Baler Bags

MANUFACTURING LOCATION

Longview, WA
Roanoke Rapids, NC

KapStone is a leading producer of wet strength kraft papers used in a wide variety of packaging applications. We offer basis weights from 40 lb to 78 lb on a 3,000 square foot basis. Our wet strength products provide superior strength, moisture resistance, good tear and puncture resistance, and an excellent printing surface.

PRODUCT FEATURES

Wet Strength Cemistry

Options

Consistent Runnability
& Uniform Profiles

Printing Capabilities

Sustainability

BENEFITS

As defined by end use requirements, wet strength chemical resins are added to maintain paper integrity in wet and humid environments. These resins act as a net of protection holding the fibers together once moisture absorbs into the sheet.

Green Stripe - A green stripe can be applied to indicate the addition of wet strength resin.

Sizing - Depending on the manufacturing location and end use requirements, additional sizing can be added to the furnish to provide additional moisture resistance.

We take pride in reducing variability across the entire manufacturing process. Our intense focus on variability reduction drives excellent profiles in the machine and cross directions - delivering efficiencies to our customers during the converting process.

For uniform ink absorption and superior printability, our wet strength kraft papers provide a clean, smooth, and low lint surface for optimal sheet printing.

We are committed to producing sustainable products for our customers that adhere to multiple forestry certification standards. Through this commitment, KapStone offers end products that are biodegradable, compostable, and recyclable.

CERTIFICATIONS

Forestry and Procurement*

SFI® Certified Sourcing and Chain of Custody
PEFC™ Chain of Custody
FSC® Chain of Custody
Compliant with the Lacey Act and EUTR (European Union Timber Regulations)

COMPLIANCES

Food Contact

Compliance with USFDA - 21 CFR §176.170 and 21 CFR §176.180

Allergen free

Environmental and Safety

US California Proposition 65 Compliant
CONEG Model Heavy Metal and EC/94/62 Article II Compliant
Elemental Chlorine Free (ECF) Unbleached fiber
Toy Safety Standards ASTM F 963 and EN71-3
BPA Free

PRODUCT CLASSIFICATIONS

Product Type

Natural, unbleached and bleached kraft paper

Basis Weights

40 - 78 lb per 3000 square feet

*FSC Chain of Custody Certification applies only to Roanoke Rapids Mill.
