## BENEFITS

FibreGreen grades are produced using pre- and post-consumer recycled fibers blended with virgin furnish.

- **FibreGreen 40** is produced for lightweight converting needs and contains a guaranteed minimum of 40% post-consumer recycled content.
- **FibreGreen 50** is ideal for heavyweight converting needs and contains a guaranteed minimum of 40% post-consumer and 10% pre-consumer recycled fiber content.

We take pride in reducing variability across the entire manufacturing process. Our intense focus on variability reduction drives excellent profiles in the machine and cross directions - delivering efficiencies to our customers during the converting process.

FibreGreen's blend of high quality recycled fibers and virgin furnish provide a clean, low lint surface for optimal sheet printing.

We are committed to producing sustainable products for our customers that adhere to multiple forestry certification standards. Through this commitment, KapStone offers end products that are biodegradable, compostable, and recyclable.
