

Collation

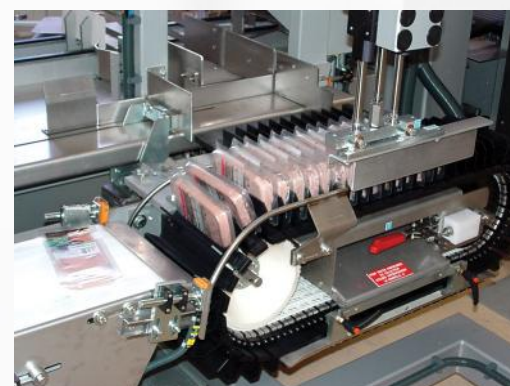

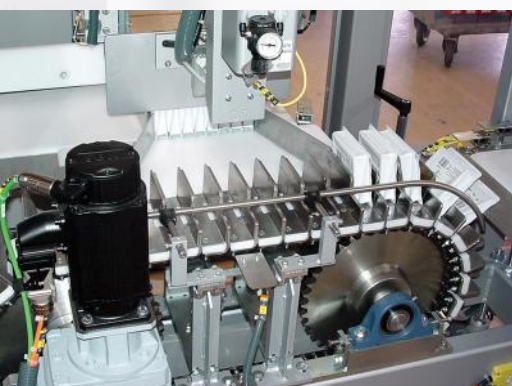

by Racetrack Collators

- Handling of products that are difficult to accumulate
- Optimum product protection
- High speed

A product collating solution to meet your specific requirements:

TECHNICAL CHARACTERISTICS

- Various collation systems for controlling the infeed of products at random: vertical collators, horizontal collators, single axis, dual axis, with chains or belts, etc.
- Pockets are specifically designed to accommodate and protect the products
- Indexing system to ensure that the pockets are accurately positioned at each phase

ADVANTAGES

- Products are isolated to eliminate accumulation constraints
- Sub-assembly adaptable to any case packing system (RSC or wrap around)
- Mechanically reliable and robust solution

PERFORMANCE

- Servo motors
- Very low noise level
- Speed: up to 500 products per minute
- Quick size changeovers
