

# EP50

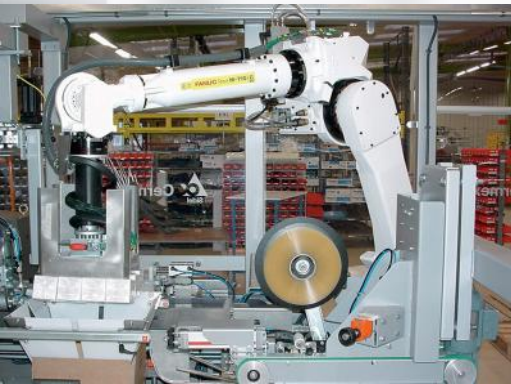

Combined Case Packing and Palletizing Unit

- Very compact unit for a complete end of line
- Product collation, case loading, checking and ejection of non-compliant cases, palletization
- Accuracy, fluidity and flexibility thanks to the 6-axis polyarticulated robot

**A compact case packing and palletizing solution to meet your specific requirements:**

#### ■ ADVANTAGES

- Wide size range in terms of product, collation and cases for maximum flexibility
- Cartons fed in individually or in bundles
- Pre-collation of layers on an intermediary table for high speeds

#### ■ ERGONOMICS

- Optimum access into the heart of the unit thanks to the cantilever structure of the frame
- Reduced magazine loading height for easy refilling
- Continuous flow by pallet changeover without cycle stop thanks to a buffer zone for stocking cases
- TPM design (Total Production Maintenance)

#### ■ PERFORMANCE

- Wide working envelope thanks to the 6-axis robot
- Unique robot tooling for gripping both products and cases
- Product protection and accuracy in movements during gripping and loading
- User-friendly HMI
